# WELCOME PACKAGE AND SKILL REVIEW.

SIT725-1.1P

My name is Ayush. I completed my Bachelors in Computer Applications from India. I'm a web developer my tech stacks are **React.js**, **Next.js**, **Tailwind CSS**, and **Framer Motion**. I'm currently building my startup called **streeats.in** which helps you find nearest underrated street food in your locality by one single tap.

I'm familiar with Javascript as I have developed various projects like Real-time flight tracker (**Flight Tracker**) using HTML, CSS, JS, REST API, and Cloud services. Movie magnet(**Movie Magnet**) using same tech stacks. Because of the fact that I, now, only build projects with React.js, Next.js, Tailwind CSS, and Framer Motion I need revision for javascript as I forgot some of the concepts which I had used in my college days in my Final year Projects.

My Target grade for all subjects are selected as High distinction because I believe I can achieve it with proper hard-work, dedication and time-management.
