Essay Title

Subtitle

My Name is Ayush Indapure. I'm from Mumbai, India. I have completed my bachelors in computer application from India itself. This unit of provides you with resources relating to Professional Communication, Respectful Behaviour, Subscriptions, feedback, and plagiarism.

My target grade for this subject will be High Distinction(HD).

The reason I choose project on sensors(Team 2) because of its idea to solve real world issues. I believe a programmer is the one who solves real-world problems instead of just developing same repeated old-skool projects like amazon clone, e-commerce websites. My SaaS project streeats.in is one such great example. My role is Chief Technical Officer (CTA). I selected this role as I have some prior experience for managing technical aspects of the project.

I believe my strength is I'm a quick learning, I grasp things much faster than others. Secondly, I'm a customer oriented or customer obsessed builder, I keep myself in the shoes of customers and question myself how would I like if would be the customer? What all features would I like in a particular product? These strengths are what make me stand out from others.

My biggest worry about working in a team is CONFLICTS between teams members.

All Four members have mutually decided to take roles which align to their interest, we also created a group in teams for effective communication and transparency between team members
